DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose an optical interference color display comprising a transparent substrate, a plurality of first electrodes on the substrate, a patterned support layer on the transparent substrate, where the patterned support layers is between the first electrodes, a plurality of optical films on the first electrode, an optical diffusion layer, and in particular, a plurality of second electrodes over the first electrodes where the second electrodes are supported by the patterned support layer and having a first, second, and third air gaps with different air gap thicknesses between the second and the respective first electrodes. Neither the Kimura (U.S. Patent No. 6,195,196) nor the Stern (U.S. Patent No. 5,771,321) reference teach a first, second, and third air gaps with different air gap thicknesses between the second and the respective first electrodes. As a result, allowance is proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
